EXPERIENCE

UMN SCHOOL OF PUBLIC HEALTH | PREDOCTORAL TRAINEE

2020 - present | Minneapolis, MN

- Funded by a **National Institutes of Health** NIGMS T32 Training Grant through the **Interdisciplinary Biostatistics Training in Genetics and Genomics** program
- Helped develop a nonlinear extension of **transcriptome-wide association studies (TWAS)** and showed that it identifies genes missed by standard TWAS
- Currently working on a method that will identify **genes with tissue-specific patterns** of genetic regulation
- Mentor: Wei Pan (University of Minnesota)

INSTITUTE FOR PURE & APPLIED MATHEMATICS | RESEARCHER

Summer 2019 | Los Angeles, CA

- Proposed novel **attractor reconstruction** and **model calibration** methods
- Showcased these methods by **inferring reaction rate coefficients** for hydrogen-oxygen combustion from a time series of one observable
- Mentors: Robert Martin and Daniel Eckhardt (Air Force Research Laboratory)

WILLIAMS COLLEGE | RESEARCH INTERN

Summer 2018 | Williamstown, MA

- Project 1: demonstrated how to improve management outcomes for **white-nose syndrome in bats** by considering metapopulation dynamics
- Project 2: established guidelines for **transboundary infectious disease management** when multiple administrative jurisdictions set different objectives
- Mentors: Julie C. Blackwood (Williams College) and Katriona Shea (Penn State)
